Product name: Penconazole 100 g/L EC

Product Specification:

Item	Specification 100 ± 10		
Penconazole content, g/L			
Water, %	0.5 max		
pH value	5.0 – 8.0		
Persistent foam, mL (after 1min)	60 max		
Emulsion stability	Qualified		
Stability at 0 °C	Qualified		
Stability at elevated temperature	Qualified		

Introduction:

Penconazole is a systemic fungicide with protective and curative action. It is sterol demethylation inhibitor, inhibits cell membrane ergosterol biosynthesis, stopping development of the fungi. It can be quickly absorbed by plants and conducted internally.

Direction for use:

Crop	Target	Application Time	Dosage rate	Method
Grape	Powdery	Before or at the early	Dilute 2000-3000	Spray
	mildew 🔨	stage of the disease	folds	

Note:

- 1. Do not use in wind or 1 hour before rain.
- 2. Fungicides in other mechanisms are recommended to use by turns to delay resistance.
- 3. This product is a triazole fungicide, which will inhibit the growth of the next crop of dicotyledons and sensitive japonica rice.
- 4. Apply three times at most for every crop cycle, and spray every 7-10 days. The PHI is 14 days.
