
Product name: Difenoconazole 250 g/L EC

Product Specification:

Item	Specification
Difenoconazole content, g/L	250 ± 15
Water, %	0.5 max
pH value	5.0 – 8.0
Emulsion Stability (Dilute 200 times)	Qualified
Stability at 0 °C	Qualified
Stability at elevated temperature	Qualified

Introduction:

Difenoconazole is a fungicide, with systemic action. It is a sterol demethylation inhibitor, inhibits the biosynthesis of cell wall sterols, interferes with the normal growth of bacteria, and has a strong inhibitory effect on sporogenesis of plant pathogenic bacteria. This product has a good effect on banana leaf spot.

Direction for use:

Crop	Target	Application Time	Dosage rate	Method
Banana	Leaf spot	Before or at the beginning of the disease	Dilute 2000-3000 folds	Spray
Banana	Scab			Spray
Rice	Sheath blight		300 – 450 mL/ha	Spray

Note:

1. Do not use in wind or 1 hour before rain.
2. Do not mix with alkaline pesticides.
3. Fungicides in other mechanism are recommended to use alternately in order to delay resistance.
4. Apply three times at most for every banana cycle and the PHI is 42 days. Apply twice at most for every rice cycle and the PHI is 30 days.
