
Product name: Fipronil 25 g/L EC

Product Specification:

Item	Specification
Fipronil, g/L	25 ± 4
Emulsion Stability (Dilute 200 times)	Qualified
Persistent foam, mL (after 1min)	50 max
Stability at 0 °C	Qualified
Stability at elevated temperature	Qualified

Introduction:

This product is a broad-spectrum insecticide with contact and stomach action. It has good control effect on termites. It is suitable for termite prevention and control on the wood wall inside the building, around the outside of the building and the soil foundation of the building.

Direction for use:

Crop	Target	Application Time	Dosage rate	Method
Building	Termites	Pre and post construction treatment	120 – 180 mL/m ³	Spray or irrigation

Note:

1. This product should be prepared for immediate use, and the prepared liquid should not be stored for too long.
2. Do not mix with alkaline pesticides. Insecticides in other mechanism are recommended to use alternately in order to delay resistance.
