
Product name: Fipronil 50g/L SC

Product Specification:

Item	Specification
Fipronil content, g/L	50 ± 5
Suspensibility, %	80 min
pH value	4.0 – 8.0
Wet sieve test, % (pass through 75µm sieve)	98 min
Pourability, residue after pouring, %	5.0 max
Pourability, residue after washing, %	0.5 max
Persistent foam, mL (after 1min)	40 max
Stability at 0 °C	Qualified
Stability at elevated temperature	Qualified

Introduction:

This product is a broad-spectrum insecticide with contact and stomach action. In some crops, it can also be used to control insects when applied as a seed treatment.

Direction for use:

Crop	Target	Application Time	Dosage rate	Method
Rice	Striped rice borer	Hatching vigorous stage	480 – 650 mL/ha	Spray
Carnation	Thrips	The initial stage of nymphs	125 – 250 mL/ha	Spray

Note:

1. Insecticides in other mechanism are recommended to use alternately in order to delay resistance.
2. Do not apply when bees are actively foraging.
3. Apply once at most for every crop cycle.
